

LIQUID LEVEL DUO

Part Numbers:

Relay: 15-0420

Single Phase: 15-0415

3 Phase: Contact ATL

Liquid Level DUO

Hidden Depths...

Behind the elegant casing of ATL's Liquid Level DUO, lies a digital control system that uses the latest solid-state technology to control your milk pump and plate cooler water valve safely and reliably- milking after milking.

Two controls- Milk Pump and Plate Cooler Water Valve in a Single, Elegant Package

Milk Level Detection Works Equally Well with 2 or 3-Probe Sensors or Float Switches*¹ without Risk of 'Plating'

Thermal Overload Trip to Protect the Entire Unit

Simple Rotary Controls to set the Milk Pump Running Time (5 - 95secs) and Plate Cooler Delay Time (0.5 - 35secs)

AC Contactor Fitted as Standard: Wired for Single Phase but may be Easily Adapted to Three Phase*²

Relay Version also Available

Manual (Continuous Running) Switch
