

DIGITAL FEEDER CONTROL

Part Numbers:

06-2080 - 12/24vDC
Switching Positive

06-2085 - 12/24vDC
Switching Negative
or 12/24vAC

Dial 'n' Feed

Brand New Version with Optional Batch Feeding

It's as simple as that with the Digital Feeder Control from **ATL**, just turn the knob until the ration your cow needs is displayed in the window, flick the switch and you are feeding, accurately, consistently and reliably.

Wide Ration Range and Digital Display

Dial up rations from 1 to 99 and they show clear on the digital display. Calibrate the feeders only once, so ration values suit you and your herd.

Controls Feeders on Herringbone, Rotary or Abreast Parlours

The control will run two feeders, left and right, on herringbone and abreast parlours or ATL dump box feeder on rotary parlours.

Automatic Overload Shutdown and Reset with Indicators
No more fuses to replace.

Expand as you Go

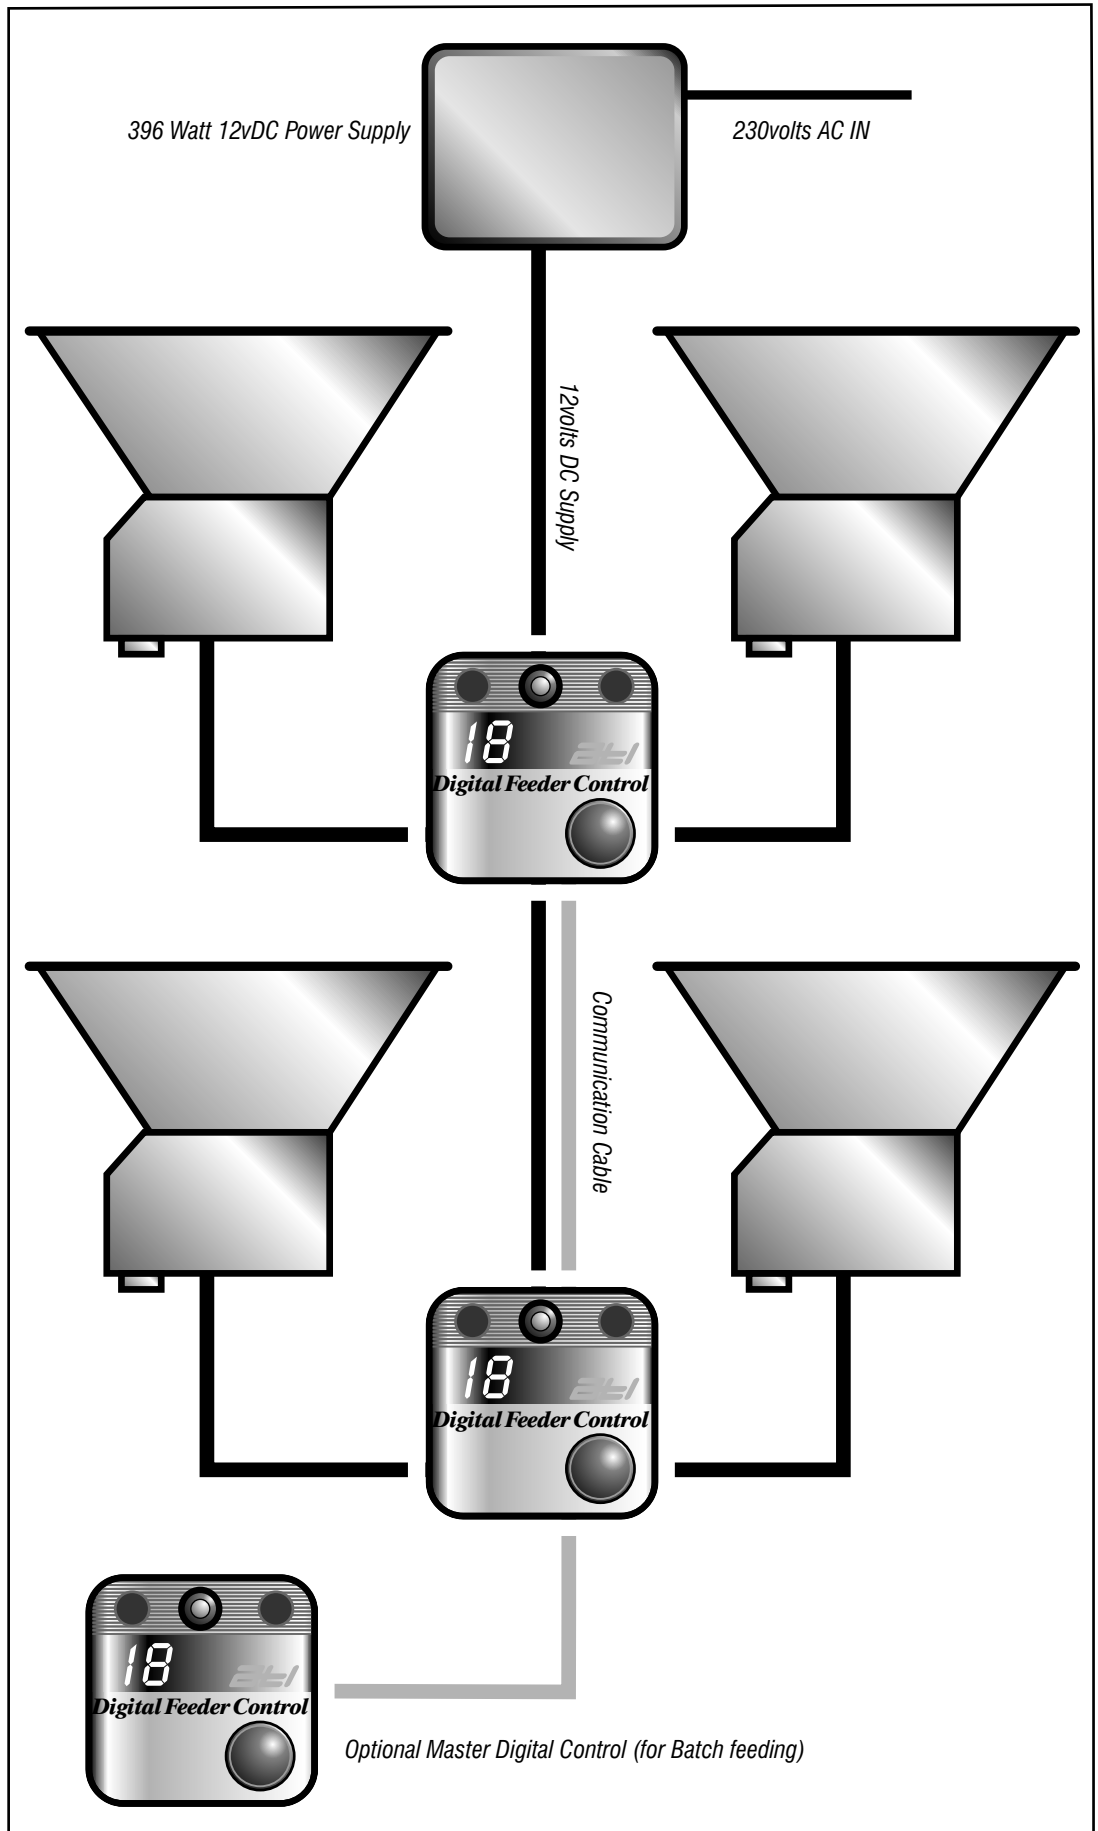

Just add another Digital Control when you need it without special setting up procedures.

Individual Feeding Standard, Batch Feeding Optional

Suitable for Electric or Vacuum Feeders in any Parlour Layout

A Simple Installation of the Digital Feeder Control
