

**FEEDER
INTERFACE**

Feeder Interface

No photograph currently available; the Feeder Interface is exactly the same size and shape as the Milk Meter Interface shown in the photograph above.

It's All Current...

The Feeder Interface contains a 24 point relay PCB for interfacing feeder controls to feeders with a different operating voltage than the control.

24pt Parlour Size As Standard

Here are the control and feeder configurations where interfacing can occur:

12VDC Control - > 12-24VAC/DC Feeder (Part Number - 10-0096)

24VDC Control - > 12-24VAC/DC Feeder (Part Number - 10-0098)
